

***In This Universe***

In this Universe

there exists only One Law:

=====

No Being shall Harm another Being.

=====

This One Law is perfect and complete.

=====

What is Law ?

=====

Law judges Actions by sentient entities.

- Law can only forbid.
- Law can neither coerce nor permit.
- Law can not create obligation.
- Law can not create permission.

Law judges

what an autonomous entity does to others.

=====

What is Harm ?

=====

Harm is an unaccepted physical Act performed by someone upon any Being.

Any Act physically affecting a sentient entity who does not accept such performed by an autonomous entity is Harm.

Harm requires all four of these elements:

1. an autonomous entity who
2. performs an Act which physically affects
3. a Being who
4. does not accept the Act.

Acts are accepted only within free choice by agreement or by forgiveness.

=====

What is a Being ?

=====

A Being is a sentient entity  
who does not Harm other Beings.

A sentient entity who Harms a Being  
is not a Being.

Judgement within The One Law  
defines who is a Being  
and who is not Being  
within The One Law.

=====

There can exist only One Law.

=====

Law can only be singular.

- Any two or more Laws eventually contradict each other.
- Multiple Laws contradict exponentially.
- Contradiction between laws destroys the authority of law.
- Nothing can be added to The One Law.

=====

Life within The One Law is  
living within peaceful transactions of others.

Life outside The One Law  
is living between moments of Harm.

Living outside The One Law  
means never knowing  
when someone nearby  
will perform some random act  
of aggression, coercion, or violence.

Those who reject the truth of The One Law  
proclaim their intention to Harm anyone  
for whatever reason they may imagine.

Those who reject the truth of The One Law  
announce their intention  
to eventually Harm others.

=====

## Living within The One Law

=====

People living within The One Law live without fear of each other.

Prosperity thrives in the absence of fear.

The absence of violence is an economic resource defying calculation.

=====

The One Law defines Freedom as whatever a Being may choose to do without Harming other Beings.

The One Law guarantees Liberty by the absence of coercion.
